1 Introduction

This report summarises reported **malaria** cases across three regions over twelve months. It is a *worked solution* for the Quarto workshop and demonstrates Markdown, inline code, figures, tables, and cross-references. See the Quarto documentation for more.

The dataset covers 36 monthly observations and 1414 cases in total.

2 Results

2.1 Cases over time

Figure 1 shows monthly cases by region.

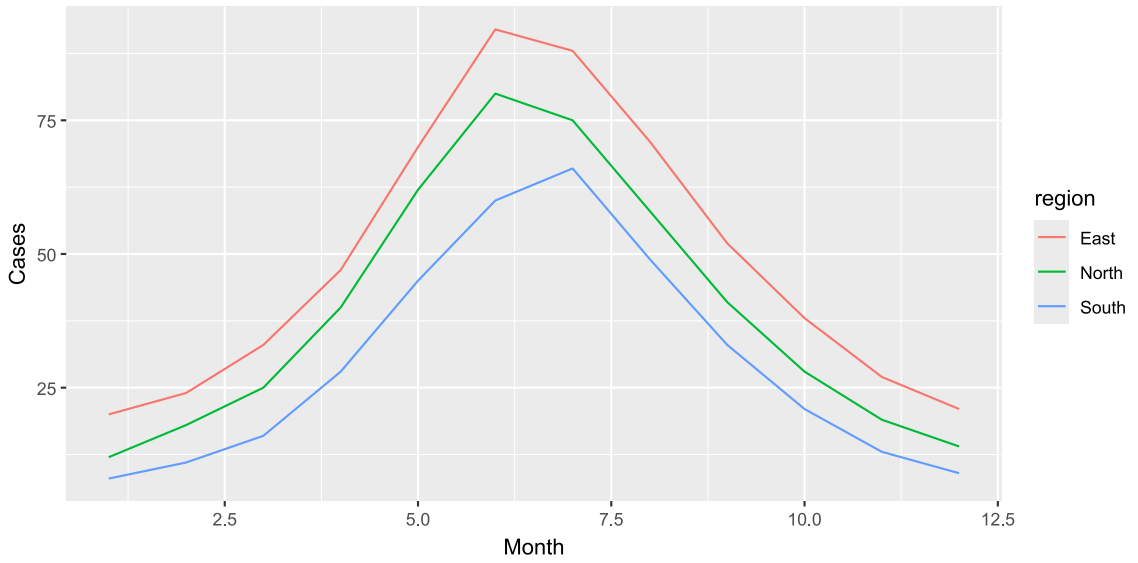

Figure 1: Monthly reported malaria cases by region.

2.2 Summary table

Table 1: Total and mean monthly cases by region.

region	total	mean
East	583	48.6
North	472	39.3
South	359	29.9

3 Discussion

As shown in Figure 1, cases peaked mid-year across all regions, with the totals summarised in Table 1. Reproducible reporting like this supports transparent surveillance [1].
